

## Utilities module

### DESCRIPTION

- This unit supplies the energy required for various measurement, control and regulation units.
- The unit is delivered complete with instrumentation and technical documentation.
- Designed and manufactured to industrial standards.
- The connections to other components are easily made.

### SUGGESTED APPLICATIONS

- This unit is designed to complement units using water or compressed air.
- Designed for easy access to various components.

# UTL 100

## 1. Water tank

Polypropylene  
Capacity : 100 L

## 2. Refrigeration group 1cv

Immersed evaporator – stainless steel  
Refrigerating power 2 kW

## 3. Multicellular water pump – stainless steel

Power 0.75 kW  
Flow rate 4 m<sup>3</sup>/h @ 2.7 b (40 psi)  
Maximum pressure :5.5 b (80 psi)

## 4. Variable area flow meter

0 – 4 m<sup>3</sup>/h

## 5. Air compressor

Tank : 6 L  
Maximum pressure : 8 bars (120 psi)  
Power : 1.5 kW

## UTILITIES

Electricity : 230 VAC single-phase– 50 Hz

## DIMENSIONS

Length : 900 mm  
Width : 800 mm  
Height : 1000 mm  
Weight : 120 kg
